EDUCATION

Bachelor of Science, Computer Science	Grad Dec 2024
Master of Science, Computer Science	Grad May 2027 expected
California State University Los Angeles	GPA 3.9

PROJECTS

Software Engineering – Class Project 8/2025 - present

- In the process of developing Linko, an AI-powered intelligent agent that automates LinkedIn job hunting through profile parsing, recruiter discovery, and personalized outreach
- Incorporates a context-aware messaging system and application form mapper, reducing manual job search effort while boosting recruiter response rates
- Implements an end-to-end workflow with NLP/LLM integration, human-in-the-loop review, and performance tracking dashboards for smarter job applications.

Santa Barbara Public Defender's Software 08/2023 - 05/2024

- Worked with senior design team at university to manage the migration of 100 terabytes of data to the cloud infrastructure
- Developed and executed automated workflows for processing content uploaded to Box.com, encompassing transcription, and facial recognition
- Worked with node.js and json identifiers to implement formatting and tagging protocols for low-confidence transcript segments using insights from Video Indexer, ensuring accurate and reliable documentation within case files

ORGANIZATIONS

Association of Computer Machinery (ACM) 08/2022 – present

Role – General Committee Leader

- Help ACM by attending general meetings, workshops, and facilitating fundraising activities
- Oversee communications with other students and faculty
- Participate in workshops that are being offered to incoming freshman and currently enrolled students

SKILLS

HTML, CSS, JavaScript, C++, Java, Python, Node.js, MySQL, MongoDB
